It is possible to be unable to duplicate a problem, because of data corruption or because we have not exactly duplicated a particular operating environment. In such circumstances, we can only continue to try to fix the problem if we can either access the system with Symantec PCAnywhere or by some other means access or duplicate the system.

A/P License Checking Features

License Checking allows the assigning of license descriptions and corresponding expiration dates for vendors that require subcontractor licenses or insurance policies. This enhancement is used for tracking vendor licenses and expiration dates and for preventing payment to those vendors with expired licenses or policies. **APLC** features:

- License descriptions and expiration dates can be set-up for each vendor. Up to three license descriptions and expiration dates can be set-up for each.
- A new option: **Disallow Check Entry For Expired Licenses** has been added to the A/P Options window. This feature prevents checks being entered for vendors with expired licenses.
- A/P Invoice Data Entry, P/O Purchase Order Data Entry, P/O Receipt of Goods Entry, P/O Receipt of Invoice Entry, and P/O Return of Goods Entry have been modified to alert the user during data entry of expired vendor licenses.
- A/P Manual Check Entry and A/P Check Data Entry have been modified to alert the user during data entry of expired vendor licenses. In addition, if the new A/P Option has been set to **Yes**, then check entry will be disallowed for those vendors.
- A/P Invoice Payment Selection has been modified to not select any invoices for payment for those vendors with expired licenses. This will occur if **Disallow Check Entry For Expired Licenses** has been selected.

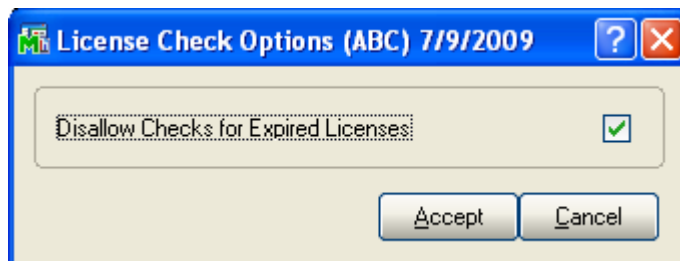

SECTION B System Operations

A/P License Check Options

The A/P License Check Options program has been added to the end of the A/P Setup menu.

Disallow Checks For Expired Licenses:

If this field is checked, APLC will not allow check processing for vendors with expired licenses, and **A/P Invoice Payment Selection** will not select invoices for vendors with expired licenses.

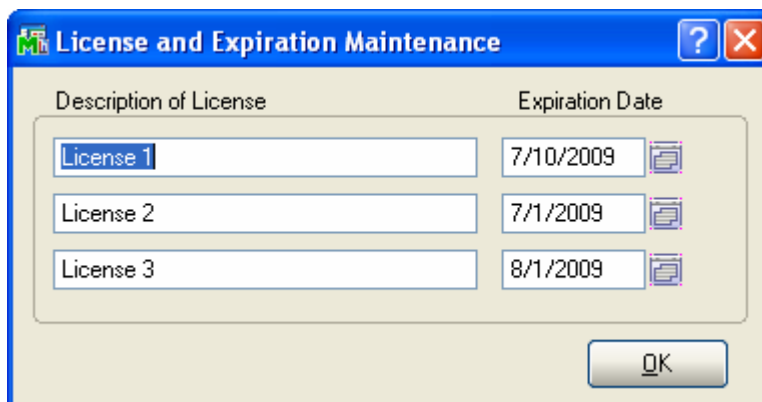

A/P Vendor Maintenance / Inquiry

The A/P Vendor Maintenance / Main Panel has been modified to have a new **License** button.

To access the **License and Expiration Maintenance Check Panel**, select the **License** button.

As you can see in the example on the right, there is a group of six fields in this window, two for each of three licenses to track. For each license, enter a description and an expiration date. This date is checked against when APLC checks for expired licenses.

The A/P Vendor Inquiry / Main Tab panel has also been modified to allow inquiry into the License information. To access the **License and Expiration Maintenance Check Panel**, select the **License** button.

The A/P Vendor Inquiry / Main Tab panel has also been modified to allow inquiry into the License

Expired License Warning

A new **Expired License Warning** pop-up window will be displayed during data entry when a vendor is selected that has an expired license. This window displays the license(s) that have expired and the expiration dates. An example of a License Warning Window is shown below.

The following data entry programs have been modified to display this warning for expired licenses:

- A/P Invoice Data Entry.
- A/P Manual Check Entry
- A/P Check Data Entry
- P/O Order Purchase Order Entry
- P/O Receipt of Goods Entry
- P/O Return of Good Entry

Once the user presses the **Ok** button to continue, the data entry can continue except for **A/P Manual Check Entry** and **A/P Check Data Entry**. See the next section for a description of these check-processing programs.

Check Processing

The **A/P Manual Check Entry** and **A/P Check Data Entry** programs, like the other data entry programs, have been modified to display the **Expired License Warning** pop-up window during data entry when a vendor is entered that has an expired license. If the **A/P License Check Options** checkbox, **Disallow Checks For Expired Licenses**, has been checked, then check processing may continue as normal. Otherwise, processing for that vendor will be disallowed, and the program will prompt for another vendor number.

A/P Invoice Payment Selection

If the **A/P License Check Options** checkbox, **Disallow Checks For Expired Licenses**, has been checked, then invoices for vendors with expired licenses will not be selected.

A/P Vendors without Licenses

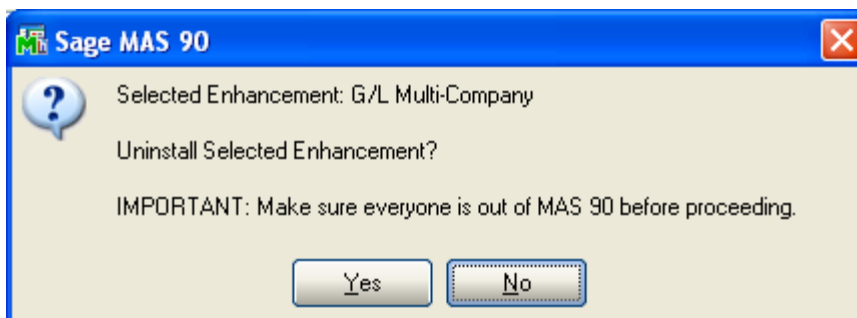

For those vendors that do **not** require license checking, simply leave the license fields blank for those vendors.
