It is possible to be unable to duplicate a problem, because of data corruption or because we have not exactly duplicated a particular operating environment. In such circumstances, we can only continue to try to fix the problem if we can either access the system with Symantec PCAnywhere or by some other means access or duplicate the system.

Item and Customer Sales History Rebuild Utility Features

IMFX is a rebuild utility designed to rebuild the **IM9** (I/M Inventory Item Sales History), **IM_13** (I/M Customer Item Sales History), **SO_SalesHistory** (S/O Item Sales History) and **AR_CustomerSalesHistory** (A/R Customer Sales History) files.

The Sales History files are rebuilt from data in the **AR_InvoiceHistoryHeader** (AR Invoice History Header File) and **AR_InvoiceHistoryDetail** (AR Invoice History Detail File) files.

IMFX correctly handles systems for which Inventory is on a fiscal basis and it is a particularly useful reseller tool for end-users who have changed their fiscal basis, and want their sales history to match their new fiscal periods.

Note: *The rebuild capability depends on the existence of A/R Invoice History for the selected rebuild period(s).*

New Features

The lower portion of the main panel has also been added, which includes useful information concerning the current fiscal period and year.

Section B: Getting Started

CAUTION

- **If you reinstall or upgrade one of the MAS 90 modules listed in the following table, you must also reinstall this Enhancement.**
- Enhancements from different Master Developers are generally not designed to work together. If installed together, problems are likely to occur.
- **Check with DSD before installing more than one Enhancement.**
- **Do not install this Enhancement on MAS SQL Systems.**

Required Levels

MAS 90 Module	Module Required	Required Level
I/M	Y	4.10
A/R	Y	4.10
S/O	N	4.10

Installation

The following instructions are for installing to Windows. For UNIX instructions see the "INSTALL.HTM" HTML file on the CD-ROM (you can use a Windows machine to view it.) It will guide you in mounting the CD-ROM on the UNIX file system and running a UNIX installation script.

1. **Back-up:** Exit all MAS 90 / MAS 200 sessions. Back-up existing MAS 90 / MAS 200 data.
2. **Check Levels:** MAS 90 / MAS 200 module levels **must match** those listed above.
3. **Run Enhancement Setup Program:** Insert the installation CD-ROM. The installation will normally run automatically, otherwise, run SETUP.EXE on the CD-ROM. This can be run from the server or a workstation. Follow on-screen instructions. *If installing from an e-mail message or from a Web download, run the program sent to you (or downloaded). This will self-extract and run same Setup program.*
4. **Re-Start MAS 90 / MAS 200:** MAS 90 / MAS 200 will be updated.
5. **Unlock the Enhancement:** DSD Enhancements must be unlocked to run. When any part of the Enhancement is run for the first time, the **DSD Enhancement License Agreement and Activation** window will appear. Follow the steps shown on that window. *You can click the Help button for more detailed instructions.*

Note: On the next page is a screenshot of the DSD Enhancement License Agreement and Activation window.

After accepting the License Agreement, you can then select the type of unlocking that you'd prefer. The choices are Normal, Demo and Web.

Normal Unlock: You will need to unlock the Enhancement by calling DSD during business hours (8am to 5pm PST) at **858-550-5900**.

Web Unlock: If the system that is running the DSD Enhancement has web access and you have a DSD WebUnlock code, can unlock the Enhancement without assistance using WebUnlock. When this option is selected, the window will change to show the WebUnlock entry section. Enter the WebUnlock code and click the Unlock button.

- Entering a WebUnlock code will unlock all DSD Enhancements that have been licensed.
- The MAS 90 / MAS 200 system that is being used must have web access for this option to be available.
- You can get a WebUnlock Code from your DSD Enhancements sales representative.

Demo Unlock: If a Demo mode is available for the Enhancement you're running, you will be able to Demo unlock the product without assistance from DSD for demo purposes.

- Creating a Demo Unlock is a good way to temporarily unlock DSD Enhancements off-hours, if you do not have web access and/or an WebUnlock code. Later, you can unlock the product fully, during business hours.

Note: You can also unlock a DSD Enhancement through the DSD Enhancement Control Panel window. This is accessed at the bottom of the Library Master Utility menu. Select the Enhancement with your mouse from the list of Enhancements and click the **Unlock Product** button on the right side of the window.

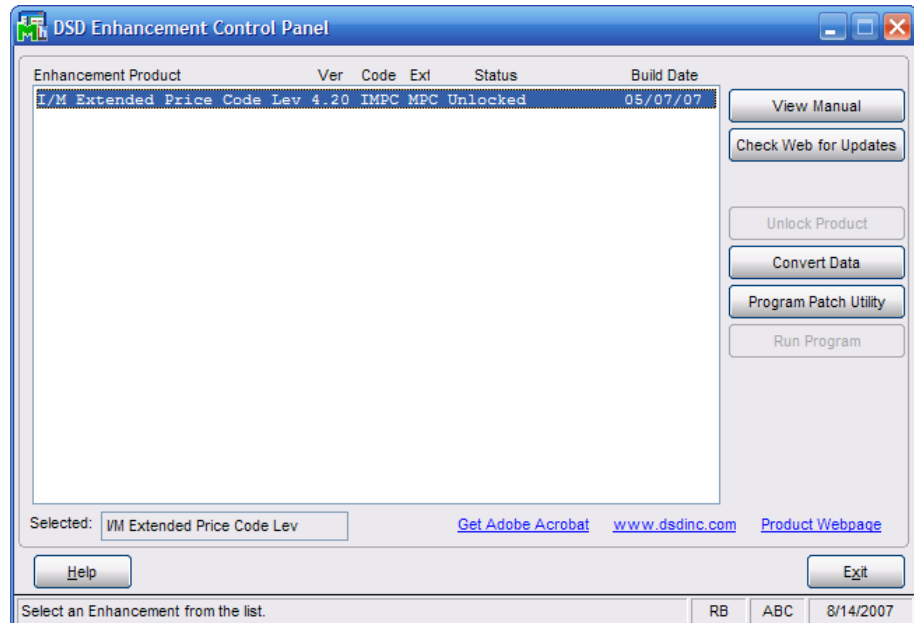

6. **Convert Data:** After registration, the Data Conversion window will appear. Follow on-screen instructions to complete data conversion. You can exit the conversion program without converting data. The Enhancement will not proceed, however, until data is converted. If you enter an enhanced program and data has not been converted, the conversion program will run again.

DSD Enhancement Control Panel

Starting with version 4.10, all DSD Enhancement products include DSD's Enhancement Control Panel. The **DSD Enhancement Control Panel** is accessed from the **Library Master Utilities** menu.

The DSD Enhancement Control Panel is a simple to use yet powerful system to help maintain DSD Enhancements installed on a MAS 90 / MAS 200 system. To use it, select an Enhancement product from the list on the window and then click the button, on the right side of the window, which corresponds with the desired task.

View Manual: This button will display the product manual for the selected Enhancement using Adobe Acrobat. For this to be possible, the PDF file for the corresponding manual must be in the “MAS90/PDF” folder in the MAS 90 system. If the file is not present, and the system has web access, the correct PDF file will be automatically downloaded from the DSD website, put into the “MAS90/PDF” folder and then displayed.

Check the Web for Updates: This button will check the DSD website to see what the current build is the selected Enhancement and alert the user if a later version is available. *This requires a web connection on the MAS 90 / MAS 200 system.*

Unlock Product: This will cause the DSD Enhancement License Agreement and Activation window to appear. Using this window is described on the previous page. *This button is disabled if the selected Enhancement is already unlocked.*

Convert Data: After verification, the selected Enhancements data conversion program will run.

Program Patch Utility: Only use this option under the guidance of a DSD Enhancement Technician. That person will guide you in its use.

Run Program: This button is enabled for certain DSD Utility programs only.

Additional Controls

Help: The Help button, located at the bottom left of the window, opens an HTML help file similar to the above.

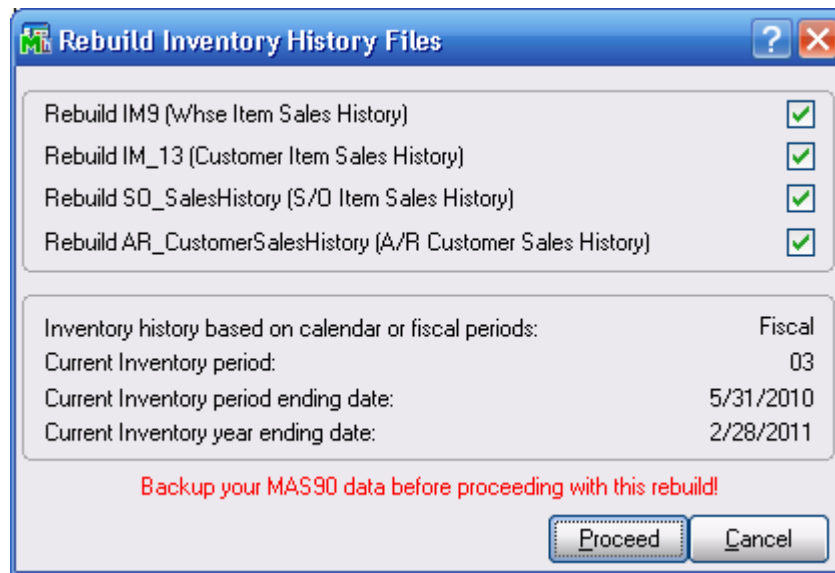

Get Adobe Acrobat: Opens the Adobe Acrobat website to the page where Acrobat can be downloaded and installed.

There are also links to the DSD website and the Enhancement page on that site.

Section C: System Operations

Accessing the Item and Customer Sales History Rebuild Utility

Starting with version 4.10, the utility is available on the **Inventory Management Setup** menu. Choose menu item **Rebuild Inventory History Files**. When the user selects the menu item, this window is displayed:

Selections

Rebuild IM9 (Whse Item Sales History) from AR Invoice Sales History

When this box is checked, the IM9 file will be included in the rebuild.

Rebuild IM_13 (Customer Item Sales History) from AR Invoice Sales History

When this box is checked, the IM_13 file will be included in the rebuild. In general, both IM9 and IM_13 should be rebuilt together, as they are “mirrors” of each other.

Rebuild SO_SalesHistory (S/O Item Sales History) from AR Invoice Sales History

When this box is checked, the SO_SalesHistory file will be included in the rebuild.

Rebuild AR_CustomerSalesHistory (A/R Customer Sales History) from AR Invoice Sales History

When this box is checked, the AR_CustomerSalesHistory file will be included in the rebuild.

Processing

When the **Proceed** button is pressed, **IMFX** scans the AR_InvoiceHistoryHeader and AR_InvoiceHistoryDetail files, and rebuilds the selected files.

Important Note: Please backup your IM9, IM_13, SO_SalesHistory and AR_CustomerSalesHistory files prior to using this utility!

This utility will make a copy of each file it rebuilds where the file name will be appended with a session number and an extension of .OLD (ex: IM9XXLB082409453952.OLD).
