

# Are you a CIO aiming for the cloud? Let us help you reach it.

The Microsoft Azure cloud helps CIOs encourage a seamless organizational transition to the cloud. We want to make a difference to the way organizations work by consolidating operational computing processes across entire enterprises with Microsoft Azure's cloud hosting service.

In addition, we make it possible for organizations to see returns from bringing new cloud efficiencies into operational infrastructure, completely revolutionizing the way data is used, stored, and accessed across companies. So, if you're a CIO seeking better data security, or looking to lower your overall IT costs, moving to the cloud brings with it a whole host of benefits that revolutionize your business.

## We believe in giving you more control over your data.

The Microsoft Azure cloud helps organizations avoid the manual burden of upgrading old tech in order to stay afloat of growing data pools. In this case, cloud solutions are built with automatic updates to add new features as they become available. Cloud can provide your organization with entirely lean methods of managing and controlling your data storage.

## Migrating to the cloud poses the following benefits:

1

### Resource Cost Minimization

Cloud helps control your overall IT costs because it removes the need to maintain on-site hardware or specialized personnel. This provides your organization with capacity to easily grow your userbase as your business evolves.

2

### Enhanced Security

Microsoft Azure spends over \$1b p/a on upgrading and securing their infrastructure, whilst proactively monitoring their systems in a way that few private companies with an on-prem infrastructure can rival.

3

### Growth And Scalability

As your company evolves, the added capabilities of cloud deployment beneficial in supporting growth. As a CIO, cloud computing will allow you to increase or decrease IT resources as needed to meet changing demand.

4

### Cost Efficient Data Storage

Cloud migration is remarkably cheaper than running and managing your own servers, and our pricing flexibility prevents any infrastructure from going to waste. In this way, cloud ensures cost efficiencies when it comes to storing data.

If you are currently using an on-premises solution, are looking to move your deployment to the cloud, or are simply holding out for a more seamless transition to the cloud, then migrating Sage 100 to the Microsoft Azure cloud is a great solution for you.

With Microsoft Azure's cloud hosting services boasting 99.9% uptime, migrating to the cloud brings little to no disruptions to business. At Sage, we have decades of experience making this process seamless.

## Migrating Sage 100 to the Microsoft Azure cloud is the #1 solution for all CIOs looking to achieve operational excellence.
