Support

DSD provides product support through Sage 100 resellers. Support is provided for the current version. Older versions are supported at an hourly rate. DSD's telephone number is **858-550-5900**. Fax: **858-550-4900**.

For a hard error, where the program displays an error dialog, report:

- Error number.*
- Program name.*
- Line number.*
- Program version.*
- Exact sequence that caused the error, including menus and menu selections.*
- Other pertinent information.*

If leaving a message or faxing, please include:

Your name.

Your phone number (and fax if applicable) and extension.

It is possible to be unable to duplicate a problem, because of data corruption or because we have not exactly duplicated a particular operating environment. In such circumstances, we can only continue to try to fix the problem if we can either access the system remotely or by some other to duplicate the system.

B/R Transaction History Features

The B/R Transaction History enhancement allows Bank Reconciliation transactions, such as Checks, Adjustments, and Deposits, to be stored in a History File during the Purge process.

Standard Sage 100 allows for purging of Bank Reconciliation transactions after the Bank Reconciliation Report is printed. Once this purge occurs, those transactions are no longer retained. With this enhancement, the purging process moves the transactions to a history file for future access.

A new **B/R Transaction History Inquiry** has been added to the B/R Main Menu. This Inquiry panel displays all transactions that are moved to history. The fields displayed on this History Inquiry Panel are identical to the fields displayed in Check, Deposit and Adjustment Entry, along with two new fields: Purge Date and Purge User (the user that ran the purge process).

ADDITIONAL FEATURES

- The user has the ability to “**Restore**” from history back into the Checks, Adjustments, and Deposit file. This allows the user to re-reconcile if a mistake was made.
- A **Bank Reconciliation History Report** is available to print from the new B/R Transaction History file.
- A **Bank Reconciliation By Date Report** is available, that allows the user to print a Bank Reconciliation Report based on a historical date.

Section B: Getting Started

- **If you reinstall or upgrade one of the Sage 100 modules listed in the following table, you must also reinstall this Enhancement.**
- Enhancements from different Sage Developers are generally not designed to work together. If installed together, problems are likely to occur.
- **Check with DSD before installing more than one Enhancement.**

Required Levels

Sage 100 Module	Module Required	Required Level
B/R	Y	6.20

Installation

1. **Back-up:** Exit all Sage 100 sessions. Back-up existing Sage 100 data.
2. **Check Levels:** Sage 100 module levels **must match** those listed above.
3. **Run Enhancement Setup Program:** Save the executable installation program (sent to you or downloaded from our website) in a convenient location on the Sage 100 server. Launch the program from Windows Explorer or by selecting Start/Run, and then browse for the file in the location you saved it. Follow on-screen instructions.
4. **Send your Sage Serial Number to your DSD Representative:** Send your Sage Serial Number to your DSD representative in order for us to send you back the encrypted keys to unlock your system. This serial number can be found in Library Master\Setup\System Configuration, Tab 3. Registration as Serial Number.
5. **Re-Start Sage 100:** Sage 100 will be updated.
6. **Unlock the Enhancement:** DSD Enhancements must be unlocked to run. When any part of the Enhancement is run for the first time, the **DSD Enhancement License Agreement and Activation** window will appear. Follow the steps shown on that window. *You can click the Help button for more detailed instructions.*

Note: On the next page is a screenshot of the DSD Enhancement License Agreement and Activation window.

After accepting the License Agreement, you can then select the type of unlocking that you'd prefer. The choices are File, Web, Demo and Manual Entry.

File Unlock: After receiving your encrypted serial number key file from DSD, and placing that file in the MAS90/SOA directory, selecting this option will unlock all products keys contained in the file. This means you can unlock all enhancements at once using this option.

Web Unlock: If the system that is running the DSD Enhancement *has web access* and you *have sent DSD your Sage Serial number*, you can unlock the Enhancement without assistance using Web Unlock. When this option is selected, the program will attempt to download encrypted serial number key file from DSD and then proceed to unlock all enhancements contained in the file.

- The Sage 100 system that is being used must have web access for this option to be effective.
- You can send your Sage Serial Number to your DSD Enhancements sales representative.

Demo Unlock: If a Demo mode is available for the Enhancement you're running, you will be able to Demo unlock the product without assistance from DSD for demo purposes.

- Creating a Demo Unlock is a good way to temporarily unlock DSD Enhancements off-hours, if you do not have web or email access. Later, you can unlock the product fully, during business hours.

Manual Entry Unlock: If you want to unlock a single enhancement using a single encrypted key, you can select this option and enter the 64 character key you receive from DSD by copy and paste.

Note: You can also unlock a DSD Enhancement through the [DSD Enhancement Control Panel](#) found on the Library Master Utilities Menu. Then, select the Enhancement with your mouse from the list of Enhancements and click the **Unlock Product** button on the right side of the window.

- Convert Data:** After unlocking, the DSD Conversion Wizard will appear. Follow on-screen instructions to complete data conversion. You can exit the conversion program without converting data. The Enhancement will not proceed, however, until data is converted. If you enter an enhanced program and data has not been converted, the conversion program will run again.

DSD Enhancement Control Panel

Starting with version 3.61, all DSD Enhancement products include DSD's Enhancement Control Panel. The **DSD Enhancement Control Panel is accessed from the Library Master Utilities menu.**

The DSD Enhancement Control Panel is a simple to use yet powerful system to help maintain DSD Enhancements installed on a Sage 100 system. To use it, select an Enhancement product from the list on the window and then click the button, on the right side of the window, which corresponds with the desired task.

View Manual: This button will display the product manual for the selected Enhancement using Adobe Acrobat. For this to be possible, the PDF file for the corresponding manual must be in the "MAS90/PDF" folder in the Sage 100 system. If the file is not present, and the system has web access, the correct PDF file will be automatically downloaded from the DSD website, put into the "MAS90/PDF" folder and then displayed.

Check the Web for Updates: This button will check the DSD website to see what the current build is the selected Enhancement and alert the user if a later version is available. *This requires an internet connection on the Sage 100 system.*

Unlock Product: This will cause the DSD Enhancement License Agreement and Activation window to appear. Using this window is described on the previous page. *This button is disabled if the selected Enhancement is already unlocked or if unlocking is not required.*

Unlock All Products: This will cause the DSD Enhancement All License Agreement and Activation window to appear. This window is similar to the one described on the previous page, but has only web and file as options to unlock. *This button is never disabled.*

Convert Data: After verification, the selected Enhancement's data conversion program will run. Data conversion is non-destructive, and may be triggered any number of times. Sometimes this is required to fix data records imported or updated from a non-enhancement installation.

Multi-Convert Data: Multiple Companies can be converted at the same time for a given Enhancement. *(If you have a large number of Companies to convert, please do in batches of 20 or fewer due to memory limitations.)*

Help: The Help button, located at the bottom right of the window, opens an HTML help file.

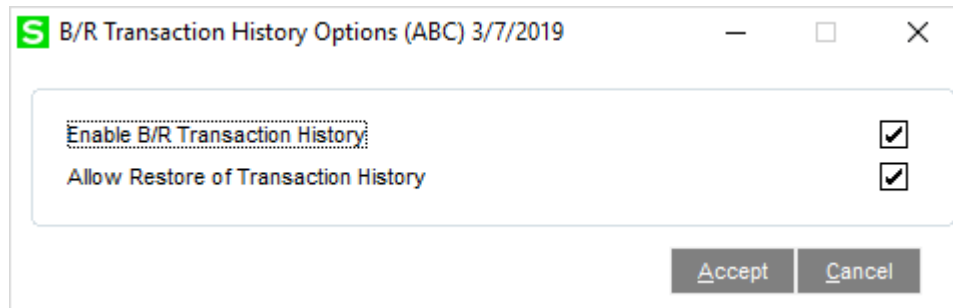

Get Adobe Acrobat: Opens the Adobe Acrobat website to the page where Acrobat can be downloaded and installed.

Uninstall Enhancement If this option is available, then selecting this button will start the un-install process, removing the enhancement from the system. (for more information see [Uninstall DSD Enhancements](#))

Section C: Setup

B/R Transaction History Options

A new **B/R Transaction History Options** has been added to the B/R Main Menu. Select this menu item to enable the Transaction History Features.

Enable B/R Transaction History: Select this checkbox to enable Transaction History for the current Company Code.

Allow Restore of Transaction History: Select this checkbox to enable the user to restore records from history back into the BR_Transaction file, so that the data is available in Check, Deposit and Adjustment entry. Restoring from history allows the user to do a re-reconciliation if mistakes were made prior to the purging process.

Section D: System Operations

Standard Sage 100 Purge process

The following behavior is standard Sage 100 processing in Bank Reconciliation.

When a user prints the Bank Reconciliation Report for a specific Bank Code, the Cleared transactions are selected for purge. The user is prompted to remove the cleared documents after the report is printed:

This enhancement modifies the purge process to move the cleared records from the **BR_Transaction** file to the new **BR234_RTH_TransactionHistory** file, just before the records are purged. The data in the new history file is used in the new **B/R Transaction History Inquiry**, **Bank Reconciliation History Report**, and **Bank Reconciliation By Date Report**. User may also use Crystal Reports to access the data in the new **BR234_RTH_TransactionHistory** file.

B/R Transaction History Inquiry

A new **B/R Transaction History Inquiry** has been added to the B/R Main Menu. Select this menu item to enable the Transaction History Features.

 A screenshot of the 'B/R Transaction History Inquiry (ABC) 3/5/2019' window. The window has a title bar with standard window controls. Below the title bar, there is a 'Bank Code' field with a dropdown menu showing 'A' and a search icon. To the right of the search icon are navigation icons (back, forward, etc.) and the text 'Security Pacific Checking'. A 'Restore' button is located on the far right. Below this is a tabbed interface with two tabs: '1. Checks' (selected) and '2. Dep/Adjust'. The main area contains a table with the following columns: Check No., Entry ..., Check Date, Reference, Payee Name, Amount, Cleared Date, Module, Comment, Purge Date, and Purge User. The table has three rows of data. The first row is highlighted in blue.

Check No.	Entry ...	Check Date	Reference	Payee Name	Amount	Cleared Date	Module	Comment	Purge Date	Purge User
001729	000000	05/05/2020	01ANDERS	Anders Auto Repair	3,540.50	03/05/2019	A/P		03/05/2019	DSD
001730	000000	05/05/2020	02ARROW	Arrowsmith Drinki...	75.00	03/05/2019	A/P		03/05/2019	DSD
SVCCHG	000000	05/31/2020		Service Charges	65.00	01/01/1809	G/L		03/05/2019	DSD

 At the bottom right of the window is an 'OK' button.

History

Bank Code: Select the Bank Code to view historical transactions.

This Inquiry panel displays all transactions that are moved to history. The fields displayed on this History Inquiry Panel are identical to the fields displayed in Check, Deposit and Adjustment Entry, along with two new fields: Purge Date add Purge User (the user that ran the purge process).

Restoring from B/R Transaction History

The user has the ability to **restore** from history back into the Checks, Adjustments, and Deposit file. This allows the user to re-reconcile if a mistake was made.

The **Restore Button** on the top-right of the **B/R Transaction History Inquiry** panel will be enabled if the **Allow Restore of Transaction History** setting in **B/R Transaction History** options is set to Checked.

To restore a history record, select the transaction from the inquiry panel, then select the Restore button.

Bank Transaction History Report

A new **B/R Transaction History Report** has been added to the B/R Reports Menu.

Section E: Uninstall DSD Enhancements

A DSD Enhancements Uninstall Utility has been provided for the purposes of removing DSD Enhancements from your Sage 100 System. This utility may be accessed from the **DSD Enhancement Control Panel** menu option on the **Library Master / Utilities** menu.

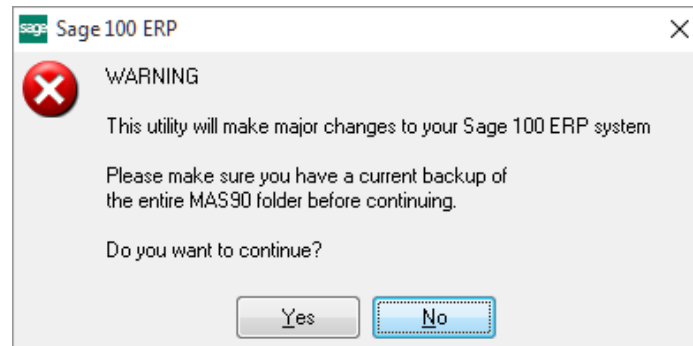

When accessing the **DSD Enhancement Control**, select the enhancement that you wish to Uninstall, and then select the **Uninstall Enhancement** button. The following message box will appear:

Select **No** to exit the Uninstall Process.
 Select **Yes** to continue with the Uninstall Process.

The following message box will appear, to remind you that a complete backup of your entire Sage 100 system should be completed prior to uninstalling a DSD product.

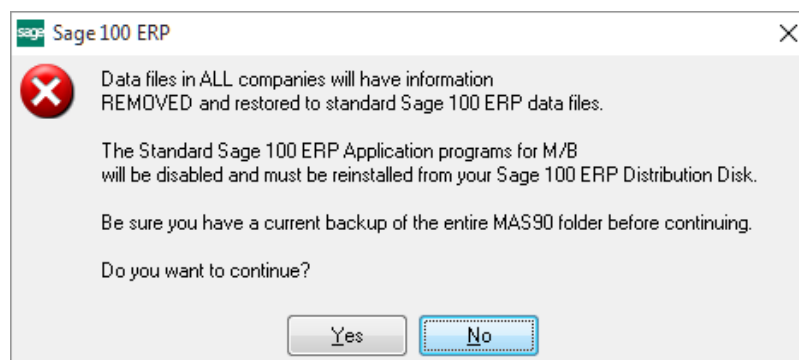

Select **No** to exit the Uninstall Process.
Select **Yes** to continue with the Uninstall Process.

After the Uninstall of the DSD Enhancement, you MUST reinstall certain standard Sage 100 modules, followed by reinstallation of Product Updates and Hot Fixes, if applicable.

A message box will appear, and will display which of those specific Sage 100 modules you must reinstall afterwards.

Select **No** to exit the Uninstall Process.
Select **Yes** to continue with the Uninstall Process.

The following message box will appear, displaying the final warning message.

Select **No** to exit the Uninstall Process.
Select **Yes** to continue with the Uninstall Process. At this point, the DSD Enhancement will be removed from the Sage 100 system.

After completion of the Uninstall, the following message box will appear. Select OK to continue.

Now that the Uninstall process is completed, you must:

- Reinstall the applicable standard Sage 100 modules
- Reinstall the latest Sage 100 Service Pack/Updates, if applicable.
- Reinstall any other DSD Enhancements or Developer products that are affected from the reinstallation of the standard Sage 100 module(s).
