Support

DSD provides product support through Sage 100 resellers. Support is provided for the current version. Older versions are supported at an hourly rate. DSD's telephone number is **858-550-5900**. Fax: **858-550-4900**.

For a hard error, where the program displays an error dialog, report:

Error number.

Program name.

Line number.

Program version.

Exact sequence that caused the error, including menus and menu selections. Other pertinent information.

If leaving a message or faxing, please include:

Your name.

Your phone number (and fax if applicable) and extension.

It is possible to be unable to duplicate a problem, because of data corruption or because we have not exactly duplicated a particular operating environment. In such circumstances, we can only continue to try to fix the problem if we can either access the system with Symantec PCAnywhere or by some other means access or duplicate the system.

I/M Transfers with Additional Costs Features

This DSD Extended Solution to the Inventory Management module adds an Additional Cost field and a G/L Account Number field to the lines tab of I/M Transaction Transfers. It will be available for all Valuation methods except 'Standard Cost.' You can add costs to Items as they are transferred from one Warehouse to another and specify the G/L account that will hold the difference.

Additional functionality is available if you also have Extended Solution IM-1060: Last Cost By Warehouse installed and enabled.

Section B: Getting Started

- If you reinstall or upgrade one of the Sage 100 modules listed in the following table, you must also reinstall this Enhancement.
- Enhancements from different Sage Developers are generally not designed to work together. If installed together, problems are likely to occur.
- Check with DSD before installing more than one Enhancement.

Required Levels

Sage 100	Module	Required
Module	Required	Level
I/M	Y	5.40

Installation

- 1. Back-up: Exit all Sage 100 sessions. Back-up existing Sage 100 data.
- 2. Check Levels: Sage 100 module levels must match those listed above.
- 3. Run Enhancement Setup Program: Save the executable installation program (sent to you or downloaded from our website) in a convenient location on the Sage 100 server. Launch the program from Windows Explorer or by selecting Start/Run, and then browse for the file in the location you saved it. Follow on-screen instructions.
- 4. Send your Sage Serial Number to your DSD Representative: Send your Sage Serial Number to your DSD representative in order for us to send you back the encrypted keys to unlock your system. This serial number can be found in Library Master\Setup\System Configuration, Tab 3. Registration as Serial Number.
- 5. Re-Start Sage 100: Sage 100 will be updated.
- 6. Unlock the Enhancement: DSD Enhancements must be unlocked to run. When any part of the Enhancement is run for the first time, the DSD Enhancement License Agreement and Activation window will appear. Follow the steps shown on that window. You can click the Help button for more detailed instructions.

Note: On the next page is a screenshot of the DSD Enhancement License Agreement and Activation window.

After accepting the License Agreement, you can then select the type of unlocking that you'd prefer. The choices are File, Web, Demo and Manual Entry.

File Unlock: After receiving your encrypted serial number key file from DSD, and placing that file in the MAS90/SOA directory, selecting this option will unlock all products keys contained in the file. This means you can unlock all enhancements at once using this option.

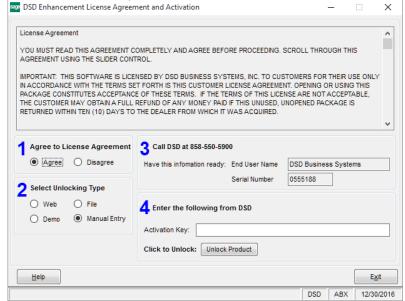

Web Unlock: If the system that is running the DSD Enhancement *has web access* and you *have* sent DSD your Sage Serial number, you can unlock the Enhancement without assistance using Web Unlock. When this option is selected, the program will attempt to download encrypted serial number key file from DSD and then proceed to unlock all enhancements contained in the file.

 The Sage 100 system that is being used must have web access for this option to be effective.

You can send your Sage Serial Number to your DSD Enhancements sales representative.

Demo Unlock: If a Demo mode is available for the Enhancement you're running, you will be able to Demo unlock the product without assistance from DSD for demo purposes.

Creating a Demo Unlock is a good way to temporarily unlock DSD Enhancements off-hours, if you do not have web or email access. Later, you can unlock the product fully, during business hours.

Manual Entry Unlock: If you want to unlock a single enhancement using a single encrypted key, you can select this option and enter the 64 character key you receive from DSD by copy and paste.

Note: You can also unlock a DSD Enhancement through the **DSD Enhancement Control Panel** found on the Library Master Utilities Menu. Then, select the Enhancement with your mouse from the list of Enhancements and click the **Unlock Product** button on the right side of the window.

7. Convert Data: After unlocking, the DSD Conversion Wizard will appear. Follow on-screen instructions to complete data conversion. You can exit the conversion program without converting data. The Enhancement will not proceed, however, until data is converted. If you enter an enhanced program and data has not been converted, the conversion program will run again.

DSD Enhancement Control Panel

Starting with version 3.61, all DSD Enhancement products include DSD's Enhancement Control Panel. The DSD Enhancement Control Panel is accessed from the Library Master Utilities menu.

The DSD Enhancement Control
Panel is a simple to use yet powerful
system to help maintain DSD
Enhancements installed on a Sage
100 system. To use it, select an
Enhancement product from the list
on the window and then click the
button, on the right side of the
window, which corresponds with the
desired task.

View Manual: This button will display the product manual for the selected Enhancement using Adobe Acrobat. For this to be possible, the PDF file for the corresponding manual must be in the

"MAS90/PDF" folder in the Sage 100 system. If the file is not present, and the system has web access, the correct PDF file will be automatically downloaded from the DSD website, put into the "MAS90/PDF" folder and then displayed.

Check the Web for Updates: This button will check the DSD website to see what the current build is the selected Enhancement and alert the user if a later version is available. This requires an internet connection on the Sage 100 system.

Unlock Product: This will cause the DSD Enhancement License Agreement and Activation window to appear. Using this window is described on the previous page. *This button is disabled if the selected Enhancement is already unlocked or if unlocking is not required.*

Unlock All Products: This will cause the DSD Enhancement All License Agreement and Activation window to appear. This window is similar to the one described on the previous page, but has only web and file as options to unlock. *This button is never disabled*.

Convert Data: After verification, the selected Enhancement's data conversion program will run. Data conversion is non-destructive, and may be triggered any number of times. Sometimes this is required to fix data records imported or updated from a non-enhancement installation.

Multi-Convert Data: Multiple Companies can be converted at the same time for a given Enhancement. (If you have a large number of Companies to convert, please do in batches of 20 or fewer due to memory limitations.)

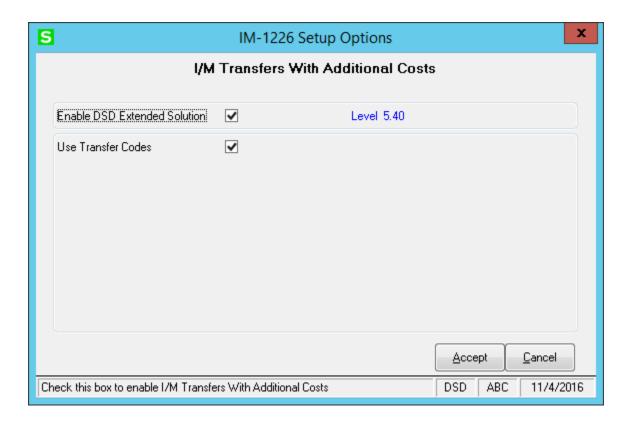

Help: The Help button, located at the bottom right of the window, opens an HTML help file.

Get Adobe Acrobat: Opens the Adobe Acrobat website to the page where Acrobat can be downloaded and installed.

Uninstall Enhancement If this option is available, then selecting this button will start the un-install process, removing the enhancement from the system. (for more information see <u>Uninstall DSD</u> <u>Enhancements</u>)

Section C: Setup

Upon completion of software installation, you will need to access the DSD Extended Solutions Setup from the Inventory Management Setup menu. Select this part number and the Setup screen for this Extended Solution will appear. Check the 'Enable DSD Extended Solution' box to activate this Extended Solution.

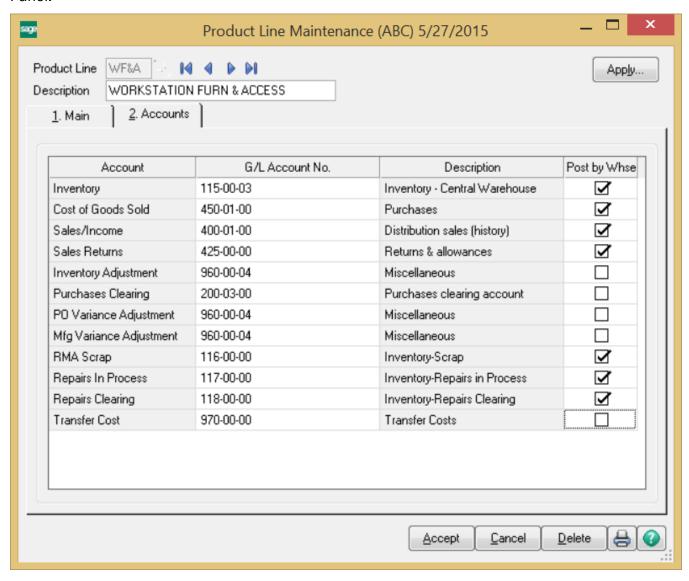

Use Transfer Codes: When you check this box, a new option will be added to the IM Setup Menu: Transfer Code Maintenance.

You should visit this Setup screen after each upgrade or reinstallation of this Extended Solution.

Product Line Maintenance

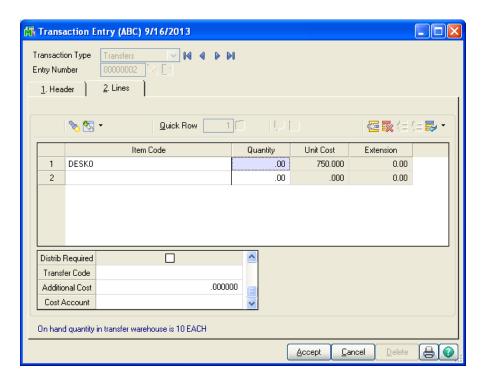

A new Transfer Cost G/L Account field has been added to the Product Line Maintenance Accounts Panel.

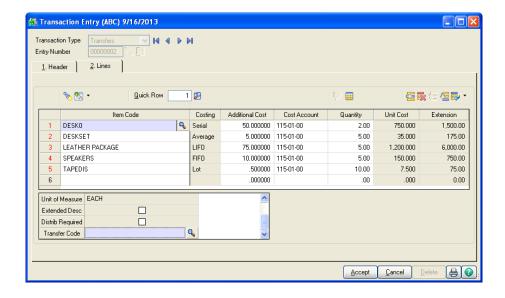

This new account will be set to the Additional Cost Account field in Transaction Entry.

Section D: System Operations

The Lines Tab of I/M Transaction Transfers has been modified with two additional fields for each Line, accessible via the Secondary Grid:

Additional Cost (which will match the Cost mask specified in I/M Setup) and Cost Account. If an Additional Cost is specified, you must define a G/L Account Number. If a Transfer Cost is setup in I/M Product Line Maintenance, then that account will be defaulted as the Additional Cost Accounts, and the data entry will to Warehouse Segment Substitution, if selected in Product Line Maintenance. Both fields can be moved to the Primary Grid.

The Transaction Register will be modified to print the Additional Cost Account & Additional Cost as an additional line following the Item Number/Description.

Transfers Register Number: IT-000001					ABC Distribution and Service Corp. (ABC				
Reference Item Code	Transaction Date	Comment Description	Unit of Measure	. Whse		Quantity	Unit Cost	Extension	
00000002	9/16/2013	Test IM-1226 Tfrs	From Warehouse	: 000					
DESK0		Oak Desk Additional Cost	EACH Account: 115-01-00	001	Addil. Cost:	50.00			
		Serial: 1000			1.00	750.000	00.008		
			Serial: 1001			1.00	750.000	00.008	
DESKSET		Desk Set	EACH	001		5.00	35.000	200.00	
		Additional Cost	Account: 115-01-00		Addd. Cost:	5.00			
LEATHER PA	CKAGE	Leather seats,dash,side panels	EACH	001		5.00	1,200.000	6,375.00	
		Additional Cost	Account: 115-01-00		Addd. Cost:	75.00			
SPEAKERS		SPEAKERS	EACH	001		5.00	150.000	800.00	
		Additional Cost	Account: 115-01-00		Addd. Cost:	10.00			
TAPEDIS		Tape Dispensers	EACH	001					
		Additional Cost	Account: 115-01-00		Addd. Cost:	0.50			
			Lot: 500			10.00	7.500	80.00	
					Trans	saction Total:	9.055.00		
							Report Total:	9,055.00	

The EXTENSION column will print the result of: (Unit Cost + Additional Cost) * Qty

For Items whose valuation method is: FIFO, LIFO, Lot or Serial, Transaction update of Transfers with additional costs will do the following:

- Increase or decrease the Unit Cost of the tier(s) associated with the transfer by the Additional Cost amount into the 'To' Warehouse. Value leaving the 'From' Warehouse will remain unchanged
- Post the difference between the Cost Extension coming out and the Cost extension going in to the General Ledger account specified on the line.
- The Last Cost fields* in Cl_Item will be updated with 'Last Cost' equal to the From WHS Unit Cost, 'Allocated' set to the 'Additional Cost' and 'Total Last Cost' as the sum of the two.

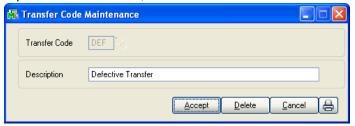

For Items with a valuation method of Average, Transaction Update of Transfers with Additional Costs will perform the following:

- Post the difference between the Cost Extension coming out and the Cost extension going in to the General Ledger account specified on the line.
- The Last Cost fields* in Cl_Item will be updated with 'Last Cost' equal to the From WHS Unit Cost, 'Allocated' set to the 'Additional Cost' and 'Total Last Cost' as the sum of the two

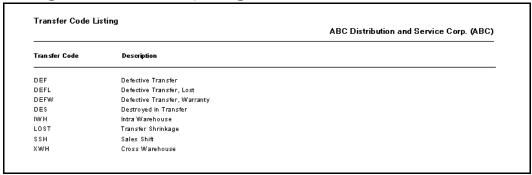

*Update of CI_Item's Last Cost fields will only be as good as the LAST transaction updated referencing this Item Number. Therefore, if multiple transfer transactions are being updated at once and an item is referenced on more than one transfer, then the last one will be reflected in the CI_Item fields.

Using Transfer Codes

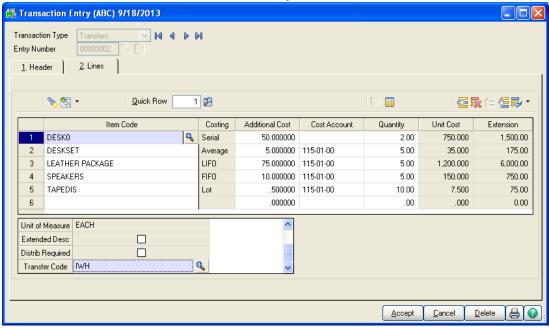

If you checked the 'Use Transfer Codes' option in Setup, a new Transfer Code Maintenance option will be added to the IM Setup Menu. On this screen, you can define a list of valid 4 character alphanumeric codes, each with a 30 character description.

A listing will be available for printing.

The Lines Tab of I/M Transaction Transfers has been modified with the Transfer Code field added for each Line, accessible via the Secondary Grid. It can also be moved to the Primary Grid.

During Transaction Journal update, the program will write out the Transfer Code used to IM_ItemTransactionHistory.

With IM-1060

If IM-1060: Last Cost By Warehouse is installed and enabled, as the IM1 fields for 'Last Cost' and 'Allocated Cost' are updated and 'Total Last Cost' is calculated, this Extended Solution will also update these corresponding fields in the Warehouse file for the 'To' side of the transfer.

Visual Integrator

The files listed below have been added or changed in the Data Dictionary by this Extended Solution for Visual Integrator purposes.

New File: Field:

IM_TransactionHeader Trans Entry Header AdditionalCost

IM_TransactionPosting TransferCode TransferCode

AdditionalCost

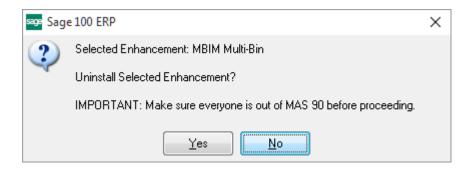

Be aware that the ODBC Dictionaries may contain other files and data fields that will be unavailable without their corresponding Extended Solutions installed.

Section E: Uninstall DSD Enhancements

A DSD Enhancements Uninstall Utility has been provided for the purposes of removing DSD Enhancements from your Sage 100 System. This utility may be accessed from the **DSD Enhancement Control Panel** menu option on the **Library Master / Utilities** menu.

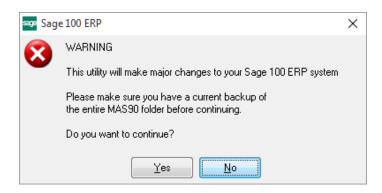

When accessing the **DSD Enhancement Control**, select the enhancement that you wish to Uninstall, and then select the **Uninstall Enhancement** button. The following message box will appear:

Select **No** to exit the Uninstall Process.

Select **Yes** to continue with the Uninstall Process.

The following message box will appear, to remind you that a complete backup of your entire Sage 100 system should be completed prior to uninstalling a DSD product.

Select No to exit the Uninstall Process.

Select Yes to continue with the Uninstall Process.

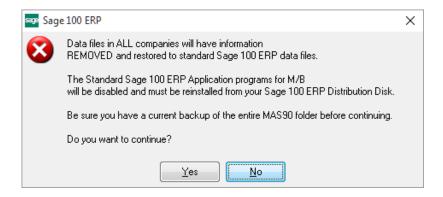

After the Uninstall of the DSD Enhancement, you MUST reinstall certain standard Sage 100 modules, followed by reinstallation of Product Updates and Hot Fixes, if applicable.

A message box will appear, and will display which of those specific Sage 100 modules you must reinstall afterwards.

Select No to exit the Uninstall Process.

Select Yes to continue with the Uninstall Process.

The following message box will appear, displaying the final warning message.

Select No to exit the Uninstall Process.

Select **Yes** to continue with the Uninstall Process. At this point, the DSD Enhancement will be removed from the Sage 100 system.

After completion of the Uninstall, the following message box will appear. Select OK to continue.

Now that the Uninstall process is completed, you must:

- Reinstall the applicable standard Sage 100 modules
- Reinstall the latest Sage 100 Service Pack/Updates, if applicable.
- Reinstall any other DSD Enhancements or Developer products that are affected from the reinstallation of the standard Sage 100 module(s).
