It is possible to be unable to duplicate a problem, because of data corruption or because we have not exactly duplicated a particular operating environment. In such circumstances, we can only continue to try to fix the problem if we can either access the system with Symantec PCAnywhere or by some other means access or duplicate the system.

'Drop Ship' Warehouse for SO and PO Features

This DSD Extended Solution allows for transactions to be made in the Inventory module for items which have been drop shipped. The user will not check the DS box in Sales Order and will not create a 'Drop Ship' type Purchase Order. Instead they will reference a setup specific warehouse on the sales order and the purchase order. When this warehouse is used on a sales order line you will have access to the Unit Cost field. When this warehouse is used on a standard purchase order, you will be allowed to create the purchase order from a sales order.

Section B: Getting Started

- If you reinstall or upgrade one of the Sage 100 modules listed in the following table, you must also reinstall this Enhancement.
- Enhancements from different Sage Developers are generally not designed to work together. If installed together, problems are likely to occur.
- Check with DSD before installing more than one Enhancement.

Required Levels

Sage 100 Module	Module Required	Required Level
S/O	Y	5.30
P/O	Y	5.30

Installation

1. **Back-up:** Exit all Sage 100 sessions. Back-up existing Sage 100 data.
2. **Check Levels:** Sage 100 module levels **must match** those listed above.
3. **Run Enhancement Setup Program:** Save the executable installation program (sent to you or downloaded from our website) in a convenient location on the Sage 100 server. Launch the program from Windows Explorer or by selecting Start/Run, and then browse for the file in the location you saved it. Follow on-screen instructions.
4. **Send your Sage Serial Number to your DSD Representative:** Send your Sage Serial Number to your DSD representative in order for us to send you back the encrypted keys to unlock your system. This serial number can be found in Library Master\Setup\System Configuration, Tab 3. Registration as Serial Number.
5. **Re-Start Sage 100:** Sage 100 will be updated.
6. **Unlock the Enhancement:** DSD Enhancements must be unlocked to run. When any part of the Enhancement is run for the first time, the **DSD Enhancement License Agreement and Activation** window will appear. Follow the steps shown on that window. *You can click the Help button for more detailed instructions.*

Note: On the next page is a screenshot of the DSD Enhancement License Agreement and Activation window.

After accepting the License Agreement, you can then select the type of unlocking that you'd prefer. The choices are File, Web, Demo and Manual Entry.

File Unlock: After receiving your encrypted serial number key file from DSD, and placing that file in the MAS90/SOA directory, selecting this option will unlock all products keys contained in the file. This means you can unlock all enhancements at once using this option.

Web Unlock: If the system that is running the DSD Enhancement *has web access* and you *have sent DSD your Sage Serial number*, you can unlock the Enhancement without assistance using Web Unlock. When this option is selected, the program will attempt to download encrypted serial number key file from DSD *and then proceed to unlock all enhancements contained in the file*.

- The Sage 100 system that is being used must have web access for this option to be effective.
- You can send your Sage Serial Number to your DSD Enhancements sales representative.

Demo Unlock: If a Demo mode is available for the Enhancement you're running, you will be able to Demo unlock the product without assistance from DSD for demo purposes.

- *Creating a Demo Unlock is a good way to temporarily unlock DSD Enhancements off-hours, if you do not have web or email access. Later, you can unlock the product fully, during business hours.*

DSD Enhancement Control Panel

Starting with version 3.61, all DSD Enhancement products include DSD's Enhancement Control Panel. The DSD Enhancement Control Panel is accessed from the Library Master Utilities menu.

The DSD Enhancement Control Panel is a simple to use yet powerful system to help maintain DSD Enhancements installed on a Sage 100 system. To use it, select an Enhancement product from the list on the window and then click the button, on the right side of the window, which corresponds with the desired task.

For this to be possible, the PDF file for the corresponding manual must be in the "MAS90/PDF" folder in the Sage 100 system. If the file is not present, and the system has web access, the correct PDF file will be automatically downloaded from the DSD website, put into the "MAS90/PDF" folder and then displayed.

Check the Web for Updates: This button will check the DSD website to see what the current build is the selected Enhancement and alert the user if a later version is available. *This requires an FTP web connection on the Sage 100 system.*

Unlock Product: This will cause the DSD Enhancement License Agreement and Activation window to appear. Using this window is described on the previous page. *This button is disabled if the selected Enhancement is already unlocked.*

Unlock All Products: This will cause the DSD Enhancement All License Agreement and Activation window to appear. This window is similar to the one described on the previous page, but has only web and file as options to unlock. *This button is never disabled.*

Convert Data: After verification, the selected Enhancements data conversion program will run. Data conversion is non-destructive, and may be triggered any number of times. Sometimes this is required to fix data records imported or updated from a non-enhancement installation.

Help: The Help button, located at the bottom right of the window, opens an HTML help file .

Get Adobe Acrobat: Opens the Adobe Acrobat website to the page where Acrobat can be downloaded and installed.

Uninstall Enhancement If this option is available, then selecting this button will start the un-install process, removing the enhancement from the system.

There are also links to the DSD website and the Enhancement page on that site.

Section C: Setup

Upon completion of software installation, you will need to access the DSD Extended Solutions Setup from the Sales Order Setup menu. Select this part number and the Setup screen for this Extended Solution will appear. Check the 'Enable DSD Extended Solution' box to activate this Extended Solution.

Drop Ship Warehouse: Specify the warehouse code that will be used to designate a drop ship transaction.

Check Vendor from I/M Master: Check this box if you wish to create P/O lines for only those S/O lines with an entry in the Item Vendors Masterfile which matches the Vendor on the P/O.

S/O Sales Order Header UDF for 'Warehouse' Default: Specify a Custom Office S/O Header checkbox type UDF if you wish to default the Order's header warehouse to the 'Drop Ship' warehouse when the UDF is checked.

You should visit this Setup screen after each upgrade or reinstallation of this Extended Solution.

Section D: System Operations

Sales Order Entry

During Sales Order Line entry, enter the Setup-specified 'Drop Ship' Warehouse on the line if you want to denote that the line is a drop ship. Do not check the 'DS' flag. When this warehouse is referenced on the line, the Unit Cost field will be available for edit.

If you specified a 'Warehouse Default' UDF, each Sales Order whose UDF is checked will default its 'Whse' field on the Order Header to the setup specified 'Drop Ship' Warehouse.

Sales Journal Update

During Sales Journal update, the line's Unit Cost will be used unless it is set to zero. In the event that the Unit Cost is zero, standard Sage 100 will attempt to locate a non-zero Unit Cost from the Inventory Masterfile per the standard Sage 100 costing hierarchy.

Purchase Order Entry

Standard Order type Purchase Order entry has been modified with a curved arrow button located in the upper-right corner of the header screen. It will allow for a toggle between the entry of a Sales Order Number and a Master/Repeating P/O Number.

When a Sales Order Number is selected

- The Purchase Order Ship-To information will default from the Sales Order Ship-To information
- If 'Check Vendor from Item Master' was left blank, then all Inventory line items which reference the Drop Ship warehouse on the Sales Order will be copied over. If you checked the Setup option, 'Check Vendor from Item Master,' then only those Sales Order lines that list the Vendor on this P/O as one of their specified Vendors in the Vendor Items Masterfile as well as reference the Drop Ship warehouse will be copied over. In either case the Unit Cost specified on the Sales Order line will default to the Purchase Order line.

Sales Order lines with the Drop Ship box checked will not transfer to the Purchase Order when creating a Purchase Order as described above.
