**Help:** The Help button, located at the bottom right of the window, opens an HTML help file .

**Get Adobe Acrobat:** Opens the Adobe Acrobat website to the page where Acrobat can be downloaded and installed.

**Uninstall Enhancement** If this option is available, then selecting this button will start the un-install process, removing the enhancement from the system.

There are also links to the DSD website and the Enhancement page on that site.

## Section D: System Operations

### TimeCard Data Entry

#### Decimal Format

When the 'Allow Punch Times to be in Decimal Format' is checked, the punch times in TimeCard Data Entry will have decimal formatting. Time entry should be in military format, e.g. '4:15 p.m.' should be entered as '16.25.' No changes have been made to any reports to reflect these punch times.

#### Hours Recap

If you checked the 'Modify Hours Recap Box to be Biweekly Hours' box in Setup, the TimeCard Data Entry Hours Recap box will be modified in the following ways:

- The Daily Hours section will be disabled.
- The title 'Weekly Hours' will be changed to 'Biweekly Hours'. The definition of Biweekly Hours is based on the TimeCard Setup question: 'Work Week Beginning Date.' Rather than seven days, Biweekly Hours will return fourteen days of activity.

The report can be selected by a range of entry dates.

C = Caucasian, B = Black, H = Hispanic, O = Asian or Pacific Islander, A = American Indian or Alaskan. If a race code other than C, B, H, O, or A is used, then the data for that race code will not appear on the report.

### Missing Entries Report

This report will print an Employee Name/Number for employees who have no TimeCard entries for a specified range of dates. The report can be selected by a range of Dates Worked.

### Lunch Punch Editing

If you checked the boxes at the prompts 'Punch In/Out for Lunch?' and 'Allow Changes to Punch In/Out Times?', you can edit the Lunch Punch-In and Lunch Punch-Out times.

The screenshot shows the 'TimeCard Entry and Edit' window for employee David Emerson (01-0001000) on 01/26/2011. The 'Main' tab is active, displaying various fields for time card entry. The 'Lunch Period' is set from 13.00 to 14.00, with an elapsed time of 1.00 and a reported time of 1.00. The 'Time In' is 08.50 and 'Time Out' is 17.50, resulting in an elapsed time of 8.00. The 'Hours Worked (Decimal)' is 8.00 and 'Hours Worked (Clock)' is 8.00. The 'Amount' is 200.00. The 'Job Number' is EEC2140 and the 'Cost Code' is 100-010-000. The 'Union' button is visible. The bottom of the window shows navigation buttons (back, forward, etc.) and a status bar with 'LB', 'EEC', and '1/25/2011'.

The Elapsed and Reported Times will be recalculated and displayed if punch-in/punch-out times are changed.

If you checked the box in TimeClock Setup 'Recalculate Hours Worked When Punch Times Change,' then the Hours Worked field is recalculated automatically when the Lunch Punch times are edited.

If you checked the box in TimeClock Setup 'Generate Exceptions for Changes to Punch Times?,' then an exception code of LP will be added to the entry.

### TimeClock Attendance Worksheet

A new selection option, accessible via the 'More' button, to include Punch Times has been added to the TimeClock Attendance Worksheet. The punch-in and punch-out times for each entry will be printed on a new line beneath each entry when this option is selected.

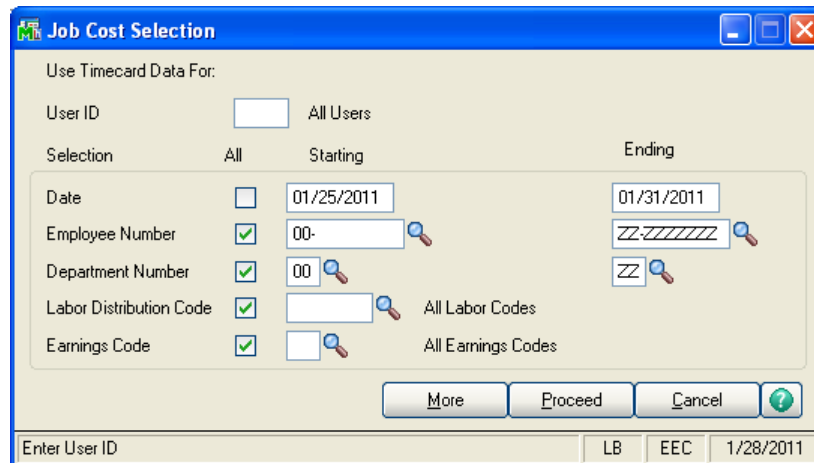

If you left the check box 'Print Daily Totals on Attendance Worksheet?' blank in Setup, the Daily Total line will not print on the Attendance Worksheet. Below is an example of the TimeClock Attendance Worksheet.
