Support

DSD provides product support through Sage 100 resellers. Support is provided for the current version. Older versions are supported at an hourly rate. DSD's telephone number is **858-550-5900**. Fax: **858-550-4900**.

For a hard error, where the program displays an error dialog, report:

- Error number.*
- Program name.*
- Line number.*
- Program version.*
- Exact sequence that caused the error, including menus and menu selections.*
- Other pertinent information.*

If leaving a message or faxing, please include:

Your name.

Your phone number (and fax if applicable) and extension.

It is possible to be unable to duplicate a problem, because of data corruption or because we have not exactly duplicated a particular operating environment. In such circumstances, we can only continue to try to fix the problem if we can either access the system remotely or by some other to duplicate the system.

Enhanced MRP Report Features

This Extended Solution to the MRP module modifies the MRP Report as follows:

- A Purchase Order Detail UDF set up as 'Arrival Date' prints in place of the P/O Required Date
- An Item Warehouse Code UDF (set up to hold an 'In Transit Flag') of 'Y' for a warehouse causes the report to create a separate total of Quantity On Hand on the Item Header
- Four columns have been eliminated
- A Sales Order Detail UDF set up as 'Customer Part No' prints the Customer Part Number in a new column on the report
- Three additional columns have been added for Customer #, Customer PO and Warehouse
- A range for customer numbers has been added
- Replaced the 'On Hand + PO + In Transit' row with an 'On PO' row

In addition, changes have been made to P/O Entry to calculate the 'Arrival Date' UDF.

Section B: Getting Started

CAUTION

• If you reinstall or upgrade one of the Sage 100 modules listed in the following table, you must also reinstall this Enhancement.

• Enhancements from different Sage Developers are generally not designed to work together. If installed together, problems are likely to occur.

- Check with DSD before installing more than one Enhancement.

Required Levels

Sage 100 Module	Module Required	Required Level
M/P	Y	7.00

Installation

1. **Back-up:** Exit all Sage 100 sessions. Back-up existing Sage 100 data.
2. **Check Levels:** Sage 100 module levels **must match** those listed above.
3. **Run Enhancement Setup Program:** Save the executable installation program (sent to you or downloaded from our website) in a convenient location on the Sage 100 server. Launch the program from Windows Explorer or by selecting Start/Run, and then browse for the file in the location you saved it. Follow on-screen instructions.
4. **Send your Sage Serial Number to your DSD Representative:** Send your Sage Serial Number to your DSD representative in order for us to send you back the encrypted keys to unlock your system. This serial number can be found in Library Master\Setup\System Configuration, Tab 3. Registration as Serial Number.
5. **Re-Start Sage 100:** Sage 100 will be updated.
6. **Unlock the Enhancement:** DSD Enhancements must be unlocked to run. When any part of the Enhancement is run for the first time, the **DSD Enhancement License Agreement and Activation** window will appear. Follow the steps shown on that window. *You can click the Help button for more detailed instructions.*

Note: On the next page is a screenshot of the DSD Enhancement License Agreement and Activation window.

After accepting the License Agreement, you can then select the type of unlocking that you'd prefer. The choices are File, Web, Demo and Manual Entry.

File Unlock: After receiving your encrypted serial number key file from DSD, and placing that file in the MAS90/SOA directory, selecting this option will unlock all products keys contained in the file. This means you can unlock all enhancements at once using this option.

Web Unlock: If the system that is running the DSD Enhancement *has web access* and you *have sent DSD your Sage Serial number*, you can unlock the Enhancement without assistance using Web Unlock. When this option is selected, the program will attempt to download encrypted serial number key file from DSD *and then proceed to unlock all enhancements contained in the file*.

- *The Sage 100 system that is being used must have web access for this option to be effective.*
- *You can send your Sage Serial Number to your DSD Enhancements sales representative.*

Demo Unlock: If a Demo mode is available for the Enhancement you're running, you will be able to Demo unlock the product without assistance from DSD for demo purposes.

- *Creating a Demo Unlock is a good way to temporarily unlock DSD Enhancements off-hours, if you do not have web or email access. Later, you can unlock the product fully, during business hours.*

The screenshot shows the 'DSD Enhancement License Agreement and Activation' window. It features a scrollable text area for the license agreement, followed by four numbered steps: 1. Agree to License Agreement (with 'Agree' and 'Disagree' radio buttons), 2. Select Unlocking Type (with 'Web', 'File', 'Demo', and 'Manual Entry' radio buttons), 3. Call DSD at 858-550-5900 (with input fields for 'End User Name' and 'Serial Number'), and 4. Enter the following from DSD (with an 'Activation Key' input field). A 'Click to Unlock' button labeled 'Unlock Product' is at the bottom. The window title bar shows 'DSD ABX 12/30/2016'.

Manual Entry Unlock: If you want to unlock a single enhancement using a single encrypted key, you can select this option and enter the 64 character key you receive from DSD by copy and paste.

Note: You can also unlock a DSD Enhancement through the [DSD Enhancement Control Panel](#) found on the Library Master Utilities Menu. Then, select the Enhancement with your mouse from the list of Enhancements and click the **Unlock Product** button on the right side of the window.

- Convert Data:** After unlocking, the DSD Conversion Wizard will appear. Follow on-screen instructions to complete data conversion. *You can exit the conversion program without converting data. The Enhancement will not proceed, however, until data is converted. If you enter an enhanced program and data has not been converted, the conversion program will run again.*

The screenshot shows the 'DSD Conversion Wizard: Step One, Introduction' window. It features the DSD Business Systems logo at the top. Below the logo, there is a message: 'This company's data needs to be converted. This program will perform the conversion.' To the right of the text is a small icon of a person running. At the bottom right, there are 'Cancel' and 'Next' buttons.

DSD Enhancement Control Panel

Starting with version 3.61, all DSD Enhancement products include DSD's Enhancement Control Panel. The **DSD Enhancement Control Panel is accessed from the Library Master Utilities menu.**

The DSD Enhancement Control Panel is a simple to use yet powerful system to help maintain DSD Enhancements installed on a Sage 100 system. To use it, select an Enhancement product from the list on the window and then click the button, on the right side of the window, which corresponds with the desired task.

View Manual: This button will display the product manual for the selected Enhancement using Adobe Acrobat. For this to be possible, the PDF file for the corresponding manual must be in the "MAS90/PDF" folder in the Sage 100 system. If the file is not present, and the system has web access, the correct PDF file will be automatically downloaded from the DSD website, put into the "MAS90/PDF" folder and then displayed.

Check the Web for Updates: This button will check the DSD website to see what the current build is the selected Enhancement and alert the user if a later version is available. *This requires an internet connection on the Sage 100 system.*

Unlock Product: This will cause the DSD Enhancement License Agreement and Activation window to appear. Using this window is described on the previous page. *This button is disabled if the selected Enhancement is already unlocked or if unlocking is not required.*

Unlock All Products: This will cause the DSD Enhancement All License Agreement and Activation window to appear. This window is similar to the one described on the previous page, but has only web and file as options to unlock. *This button is never disabled.*

Convert Data: After verification, the selected Enhancement's data conversion program will run. Data conversion is non-destructive, and may be triggered any number of times. Sometimes this is required to fix data records imported or updated from a non-enhancement installation.

Multi-Convert Data: Multiple Companies can be converted at the same time for a given Enhancement. (If you have a large number of Companies to convert, please do in batches of 20 or fewer due to memory limitations.)

Help: The Help button, located at the bottom right of the window, opens an HTML help file.

Get Adobe Acrobat: Opens the Adobe Acrobat website to the page where Acrobat can be downloaded and installed.

Uninstall Enhancement If this option is available, then selecting this button will start the un-install process, removing the enhancement from the system. (for more information see [Uninstall DSD Enhancements](#))

Section C: Setup

After installation, you will need to access the MRP Setup menu option screen. After the option screens have been displayed, a Setup screen for this Extended Solution will appear. Check the 'Enable Extended Solution' box to activate this Extended Solution (Figure 1). The manual for this Extended Solution, if it has been installed, can be viewed by clicking the 'Manual' button next to the 'Enable Extended Solution' check box. It can also be viewed via the Extended Solutions Control Center (see Installation, above). Answer the following prompts:

Answer the following prompts:

Purchase Order Detail UDF For 'Arrival Date': Enter the Purchase Order Detail 'Date' UDF you wish to hold the 'Arrival Date.'

Purchase Order Detail UDF for 'Days In Transit': Enter the Purchase Order Detail 'Numeric' UDF you wish to hold the 'Days In Transit.'

Inventory Warehouse Code UDF for 'In Transit Flag': Enter the Warehouse Code 'Yes/No' UDF you wish to hold the 'In Transit Flag.'

S/O Order Detail UDF for 'Customer Part No': Enter the SO Order Detail UDF 'String' or 'UPPER' UDF you wish to hold the Customer Part Number. The UDF selected must be 10 or fewer characters in length.

You should visit this Setup screen after each upgrade or reinstallation of this Extended Solution.

Section D: System Operations

During Purchase Order Entry, the program will calculate the Arrival Date UDF by adding the Days In Transit to the standard line Required Date field.

The Required Date column is calculated by subtracting the Purchase Order Detail 'Days in Transit' UDF value from the standard Sage 100 field. The columns for Where Used, Issued/Specified and Supplied form WO# have been eliminated and the remaining columns shifted to the left.

In the report's header, the printed Quantity On Hand value excludes quantities from any warehouse with the Warehouse Code UDF 'In Transit' flag set to 'Y.' A new value for 'In Transit' prints below the On Hand value. The In Transit value is the 'on hand' quantity summed for each of the warehouses with the UDF flag set to 'Y.' Below that prints 'On PO.' The 'On Hand + PO' row has been eliminated from the header. The Last Cost value has been removed from the report.

The Proj. On Hand field will be calculated using the new total Quantity On Hand + In Transit + On PO.

Three new columns have been added to the report:

- 'Customer #': Whenever the Type column has 'SO' or 'PD' in it, the Customer Number from the Sales Order will print.
- 'Customer PO': This column will print the Purchase Order Number associated with the Sales Order, as above.
- 'Customer PN': This column will print the SO Order Detail UDF defined in Setup.

The column layout will now be: Type, Cust #, Cust PO, Warehouse, Cust PN, PO/SO/WO #, Req Date, Demand, Supply, Proj On Hand, Sugg Ord, Action, Action by Date, New Req Date.

A Customer Number range has been added to the Std MRP Report, which is selected in MRP Generation (Figure 2). The option is available via the 'More' button (Figure 3).

Figure 1

Figure 2

When a range is entered, the MRP Report will limit the data printed to be only Inventory Items that have that a Customer Number in that range set up in the I/M Item Pricing, Customer Price Schedule. The Customer Number will print on the report in each Item Header's information.

See Figure 3 for an example of the report.

Section E: Uninstall DSD Enhancements

A DSD Enhancements Uninstall Utility has been provided for the purposes of removing DSD Enhancements from your Sage 100 System. This utility may be accessed from the **DSD Enhancement Control Panel** menu option on the **Library Master / Utilities** menu.

When accessing the **DSD Enhancement Control**, select the enhancement that you wish to Uninstall, and then select the **Uninstall Enhancement** button. The following message box will appear:

Select **No** to exit the Uninstall Process.
 Select **Yes** to continue with the Uninstall Process.

The following message box will appear, to remind you that a complete backup of your entire Sage 100 system should be completed prior to uninstalling a DSD product.

Select **No** to exit the Uninstall Process.
Select **Yes** to continue with the Uninstall Process.

After the Uninstall of the DSD Enhancement, you MUST reinstall certain standard Sage 100 modules, followed by reinstallation of Product Updates and Hot Fixes, if applicable.

A message box will appear, and will display which of those specific Sage 100 modules you must reinstall afterwards.

Select **No** to exit the Uninstall Process.
Select **Yes** to continue with the Uninstall Process.

The following message box will appear, displaying the final warning message.

Select **No** to exit the Uninstall Process.
Select **Yes** to continue with the Uninstall Process. At this point, the DSD Enhancement will be removed from the Sage 100 system.

After completion of the Uninstall, the following message box will appear. Select OK to continue.

Now that the Uninstall process is completed, you must:

- Reinstall the applicable standard Sage 100 modules
- Reinstall the latest Sage 100 Service Pack/Updates, if applicable.
- Reinstall any other DSD Enhancements or Developer products that are affected from the reinstallation of the standard Sage 100 module(s).
