SAGE 100 ERP ENHANCEMENTS

DSD
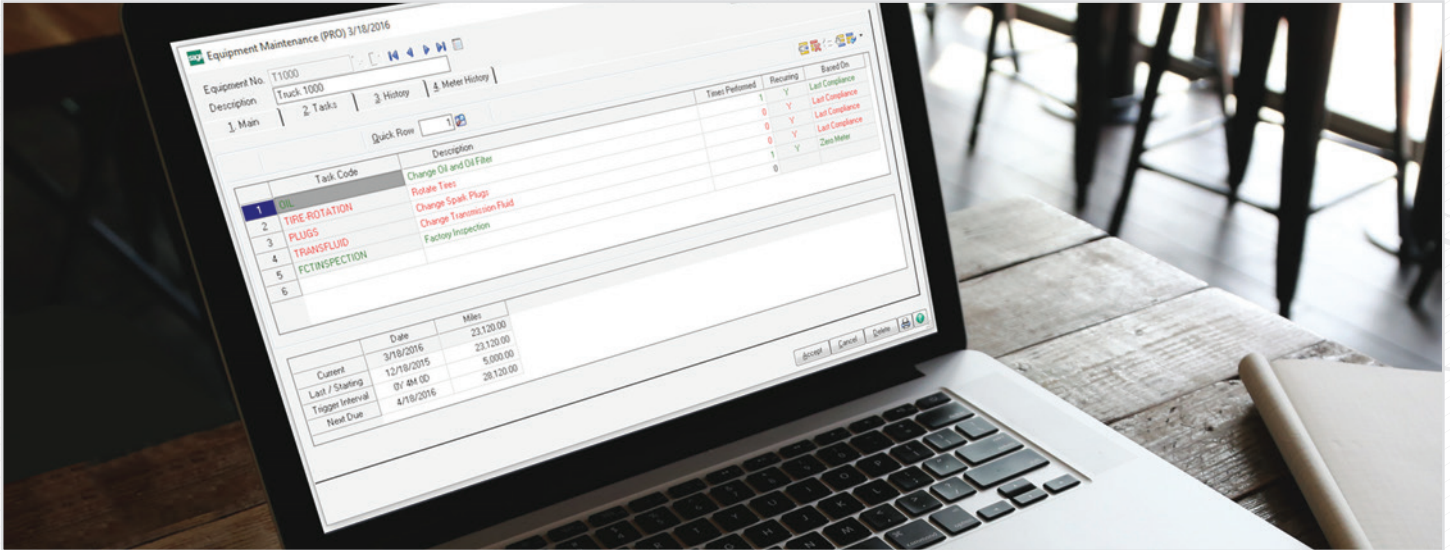

DEVELOPMENT SOLUTIONS THAT DELIVER

Track Equipment Maintenance

Monitor Company Equipment and Maintenance Tasks in Sage 100 with this specialized solution.

EQUIPMENT MAINTENANCE
SAGE 100 ERP ENHANCEMENTS

PRODUCT OVERVIEW

TRACK EQUIPMENT MAINTENANCE TASKS IN SAGE 100

Equipment Maintenance for Sage 100 is designed to track all maintenance work as well as lifetime limits for any type of equipment maintained by the company. Equipment types are user definable and can be items like vehicles, copiers, printers, pumps or any number of items. In addition to defining the type of equipment, the user can define the maintenance labels, maintenance tasks and trigger intervals. Maintenance schedules with corresponding tasks and trigger intervals are assigned to the equipment in order to prompt the user when maintenance work is to be performed. This Sage 100 addition also allows users to post inventory items against work tickets and task codes from the Inventory or Purchase Order modules.

FEATURES:

- Define equipment types
- Define lifetime limits
- Define maintenance labels such as hours, miles, meter readings, etc.
- Define maintenance tasks
- Define trigger intervals

- Define maintenance instructions
- Process work tickets
- Record log entries
- Issue inventory from stock or purchase order against work tickets
