INTELLIGENT PAYMENT PROCESSING

- **Vendor Prepayments**. Enter prepayment requests, issue prepayments, and apply prepayments to invoices as they are received. Prepayment balance is kept separate from the regular AP account.

- **Prepaid Expense Recognition.** Assign a deferred expense schedule by AP line item. Automatically split payments between the prepaid account and expense accounts.

- **AP Invoice Automated Approval and Payment.** Set up automatic processes to approve payments or establish an approval process to prioritize or delay payment. Designate an account from which to pay or select a payment method.

- **Use, VAT, and Withholding Tax Support.** Automatically calculate Use and VAT taxes and prepare tax filing reports. Assign a default tax zone to each vendor. This default can be overridden during invoice entry. Tax calculation can include multiple tax items per document line, deduction of tax amount from the price, and tax on tax calculation. Acumatica also supports withholding tax calculations.
