

SAGE INTACCT SHIPPING SOFTWARE

Mobile Ship for Sage Intacct Takes The Guesswork Out Of The Shipping Process

Take the guesswork out of the hands of the picker/shipper. Simply select which package items will be included, the dimensions of the package, a weight, and the shipping process is complete! By automating the shipping process, organizations can increase accuracy, productivity, and reduce the carrier costs of shipping operations.

Key Features:

Seamless Integration

Seamlessly integrates with your Sage Intacct ERP system, providing real-time insight.

Wireless Functionality

Print labels wirelessly from your handheld device without having to go back to a PC.

Carrier Capabilities

Out of the box integrations for both UPS and FedEx.

Carrier Selection

Assigns a carrier based on what has been indicated at the Sales Order level.

Label Printing

Automated prompts encourage users to print a label from the device before they can move to another order.

ScanForce Management Portal

Maintain historical packaging details plus automatically write back to Intacct to populate shipping charges and tracking numbers.

Why ScanForce?

ScanForce develops software solutions for Sage Intacct users. Our warehouse management, inventory control, mobile shipping, and construction management software empowers users to increase accuracy and order fulfillment, optimize workflows, and improve profitability.
