

### Handle self-performed, trade payrolls with ease.

Whether you're dealing with union, non-union, public, or private work, we've got you covered. Our streamlined rate determination and automatic tax updates help ensure you calculate payroll accurately, even for workers assigned to projects across multiple states, locals, and job types. With automated rate retrieval and the calculation of deductions and fringes such as workers comp, 401k contributions, and 401k employer match, you'll spend less time on your most complex payrolls.

### Automate complex payroll calculations and journal entry creation.

Bring in project time data, then let our powerful payroll engine calculate payroll, including direct and indirect fringes, across all payment types. After processing payroll, the journal entries will automatically be created with all the dimensions and costing details required for in-depth project and labor cost reporting. Then post to the general ledger in Sage Intacct Construction with the push of a button.

### Simplify certified payroll reporting in all US states and territories.

Go from completed payroll to submission of certified reports with an easy, guided experience. The reporting wizard walks you through the necessary steps to select data to include, such as report type, project, and employees, before automatically generating the certified payroll report to print for submission or e-file.

### Reduce cost overruns and improve the accuracy of future estimates with timely visibility into project labor costs

### Harness the power of your data for detailed reporting.

Avoid cost overruns with timely job costing reports and on-demand views into different types of job costs, such as burdened, raw, direct, and indirect.

### Quickly investigate anomalies and instantly act.

Reduce the time it takes to audit your payroll data with built in audit trails on every transaction and the ability to drill down to the most minute details. For example, you can drill from the company level all the way down into what makes up the total cost of each hour of labor, take corrective action, and then the change automatically flows throughout the system.

### Give your people on-demand access to the data they need with customizable reports and dashboards.

Once you process payroll, your labor cost data will be available across all project cost reports and dashboards in Sage Intacct Construction. While the solution comes with pre-built reports, you can edit them or build your own to ensure you view your data the way your organization wants to. Use reports and calculated fields to build dashboards with KPIs to give everyone from project managers to executives a quick summary of the data that matters most to them. All of which are drillable from dashboard to detail.
