

Sage Intacct Cloud Accounting Software for Faith-Based Organizations

We're passionate about building accounting software that helps you navigate the complexity and demands of faith-based financial management. Nonprofits face unique challenges: from reporting and budgeting to planning and measuring impact—we want you to spend less time on administrative tasks and more time on what really matters—advancing your mission.

Built for nonprofits

As your organization grows, manual processes drain your productivity and it's difficult to analyze your growing range of data. While you're managing multiple donors and funding sources, increased demand for services, and changing regulatory requirements, we've built our nonprofit accounting software with you in mind. Sage Intacct nonprofit customers have experienced efficiency gains up to 75% and dedicate more time to strategic decision making.

We provide intuitive core fund accounting with a dimensional general ledger and accounts payable automation, push-button consolidations for multiple locations and entities, easy-to-use reporting and dashboards, and a rock-solid audit trail.

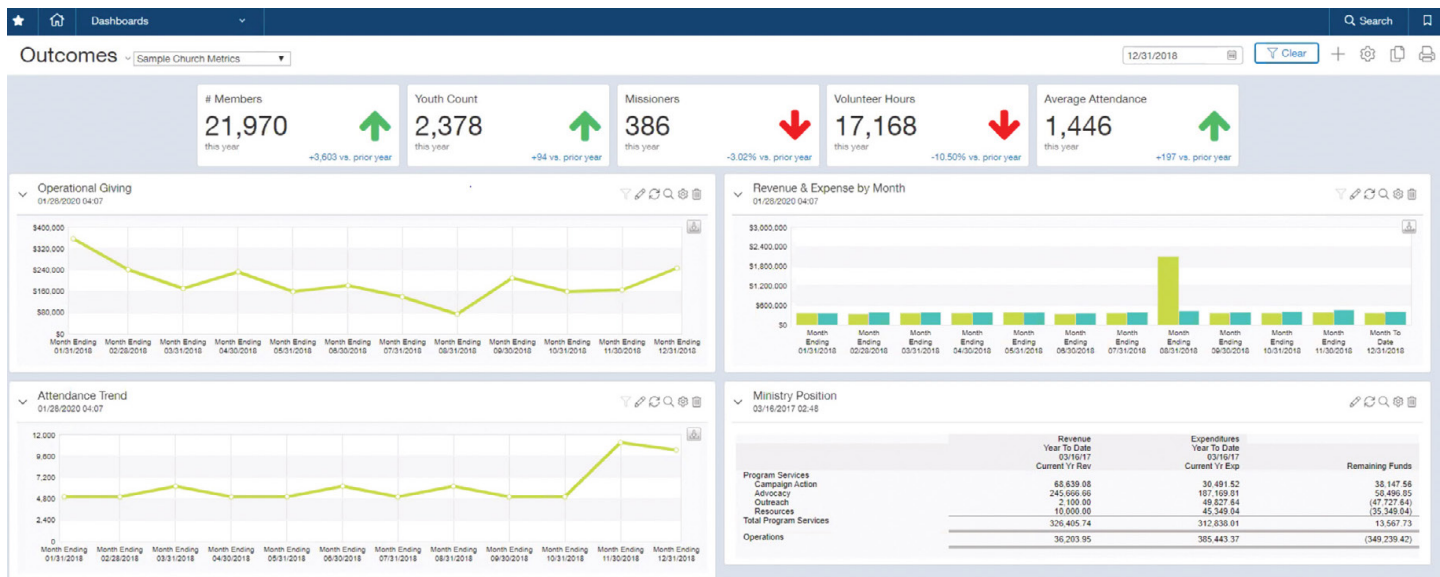

Real-time visibility and insights

Nonprofits need visibility into financial and operational metrics to make more informed decisions about programs, giving, stewardship, staffing, and more. The Sage Intacct real-time reporting allows you to measure performance for financial, operational, and outcome metrics. Every transaction in the system is tagged with dimensions, so finance teams can sort, view, filter, and report on the specific information they need. Using dimensional insight, some of our nonprofit customers have increased donations up to 25%.

True cloud technology with open API

As an innovator in the cloud space, Sage Intacct has honed a true cloud model. Sage Intacct was built to deliver multi-tenant financial management, on a platform purpose-built for finance. This allows all users to be on the same version, without complicated and expensive upgrades. Our open API lets you connect to existing or future systems. This means you can leverage key data from membership management, payroll, budgeting, CRMs like Salesforce, and others to track metrics that are central to your organization's operations and programs.

Gain visibility into critical metrics that drive your mission with Sage Intacct dashboards.

Capabilities include:

- Accounts payable
- Accounts receivable
