

# Acumatica & Netstock: A powerful inventory solution for eCommerce businesses

Ensure optimal item availability across every channel.

Netstock empowers Acumatica customers to increase inventory visibility across multiple channels reducing excess and minimizing stock-outs. Customers can quickly optimize and enhance forecasting and sales to achieve greater operational and customer efficiency in the competitive eCommerce landscape.

## Netstock enhances data in your Acumatica ERP

Synchronize inventory levels and accurately predict demand while considering fluctuations in sales, seasonality, and rapidly changing customer behavior and preferences.

### Achieve granular forecasting accuracy

- Forecast based on style, color, size, or other group levels
- Forecast per customer and channel and combine to create one replenishment plan
- Flag historical events for future forecasting
- Create seasonal group profiles to forecast new items with no history

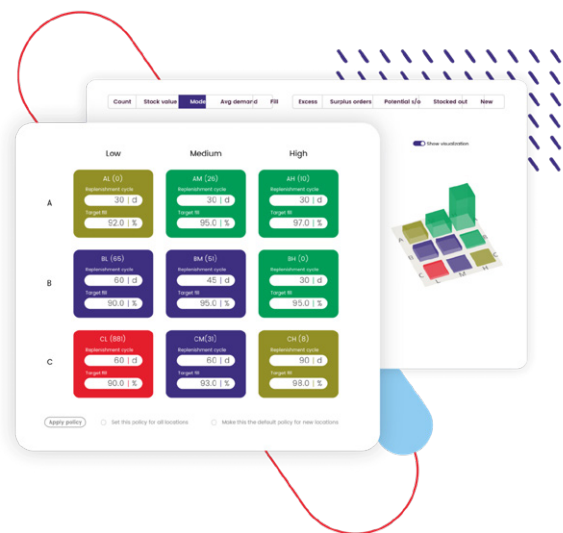

### Increase inventory visibility

- Work off a single-view dashboard to monitor key inventory KPIs
- Easily monitor all items across all distribution channels by taking seasonality into account
- Know which items are the most-profitable on which channel to plan accurate quantities
- Adjust forecast based on volatile demand and fluctuations in pricing

## Promotions and events

- Predict future outcomes of events and promotions across products, customers, and categories

## Item classification

- Automatically classify each item according to sales and velocity
- Allocate and automatically adjust safety stock levels for each item based on its inventory policies and how fast the items are selling

# Netstock unlocks operating cash

### Place orders quicker

Save time on planning, forecasting and ordering

### Minimize stock-outs

Retain customers and increase sales

### Reduce excess stock

Release cash that's tied up in excess inventory

### Enhance functional collaboration

Align sales, operations, and finance

# Why Acumatica customers trust Netstock

## Best Vinyl reduces its inventory value by 50%

With the Netstock dashboard, I can quickly see stock-outs and potential stock-outs, which allows me to have a focussed conversation with my sales team to determine what's coming up and what else I need to consider when placing orders - **Best Vinyl**.

## Tayse Rugs combats lost sales from stock-outs

For me, the Netstock classification matrix is an impressive feature as it looks at your high-value and high-velocity items and plots them on a matrix that defines each item's level of importance in your business. We could quickly see which were our slow-moving items and, by running promotions, could reduce those. We now have that "big picture" view and can action things like potential stock-outs before it becomes a problem - **Tayse Rugs**.

## Zhik reduced long lead times and high MOQ items

Netstock helped to manage our forecasts for each of our markets and consolidated our global demand, providing us with recommended orders across our style range. What used to take weeks to refresh and review our data now takes a fraction of the time and allows us to make more timely decisions. We have more time on our hands to scale our business and focus on other challenges - **Zhik**.
